

A range of non-conductive gaskets for use when only an environmental seal is required.

Typically, but not exclusively, manufactured from silicones, neoprene and EPDM and are available as die-stamped shapes or O-rings.

P&P Technology are always happy to provide guidance on the best product for your application.

RS Shielding - non-conductive gasket kits

Advantages -

- Very wide range of material options
- Can be supplied as a total solution along with EMC gaskets
- Single source for all gasket requirements
